

Dear Parents / Caregivers,

We are pleased to announce that our application to the Construction Industry Training Board (CITB) for our Pathways to Trade course has been successful with the numbers from subject counselling.

The funding from CITB allows students to access:

- \$100 subsidised towards White card training
- PPE such as a hard hat and hi viz shirt
- As well as providing up to date industry training to Mr David Rogers for the delivery of the course.

The Pathways to Trade course is designed for Year 10 students considering future studies in construction related trades. This course introduces students to a variety of construction trades, highlighting the numerous career paths and tertiary education options available in the industry.

In Year 11 students may elect to continue into VET courses in Certificate II in Construction (General, Plumbing or Carpentry focus) or a range of other trade-based VET courses.

NEXT STEPS

Your child either completed the recent immersion workshop and/or indicated on their subject choice form that they would like to complete the Pathways to Trade course next year. If this is still the case, please complete the tear off section below, along with the attached commitment to pay form (if not already completed), and return both to Mr Jarrod Jones.

Kind regards,

Jarrod Jones - Senior Leader Operations, SACE, VET and Pathways

Student name: _____

Parent / Carer name: _____

HiViz shirt size: _____

Unique Student Identifier (USI number): _____

As this is a VET course, a Unique Student Identifier number is required. If you don't have a USI number already, you can apply for one at www.usi.gov.au

Parent / Carer Signature: _____
